

Mounting Challenge headrest on aluminium SL seat

1. Make 2 holes with a 5.5mm drill in the pre-centered holes on the top of the seat.

Tip: Place the drill perpendicular on the surface.
Drill the hole.
Then when drilling, align in the length of the seat.

2. Make 4 holes with a 5mm drill in the pre-centered holes on both sides of the seat
3. Place the L-shaped brackets. Do not tight the nuts yet.
4. Align the brackets by sliding in the slot holes.
5. Tight up the nuts.

6. Pre-align the headrest by adjusting the upper lock-rings
7. Place the lower lockrings with a slight tension to the bracket.

Tip: press the bracket a few mm up with your thumb to create the tension.

8. Adjust the headrest just under your helmet.
